

ASSET MANAGEMENT SOLUTIONS

PARTS Pro

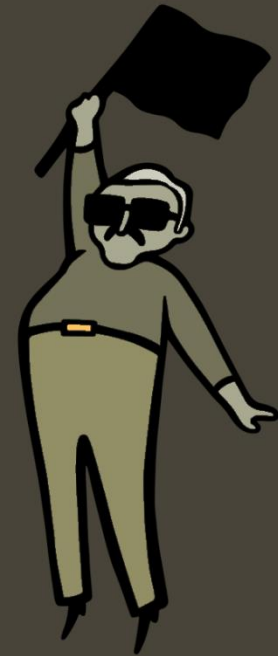

PARTS Pro evaluates your work orders every night to determine what parts you'll need, when you'll need them, and if they are in stock and intelligently allocates stocked parts to work orders according to priority so they are ready when you need them. This saves you significant man hours and limits production downtime!

PARTS Pro → Part Availability and Readiness To Schedule

A Better Way to Manage Inventory & Parts!

- ✓ Avoid production downtime
- ✓ Automagically assign parts to work orders according to work priority & part availability
- ✓ Automated daily review of work orders to confirm parts availability & inventory issues
- ✓ Notifies you if parts were "stolen" (aka pulled for an emergency) in the middle of the night

This saves you significant man hours and limits production downtime!

PARTS Pro

You no longer have to worry about constantly watching for part availability or causing inventory-related production down times!

AMS PARTS Pro evaluates your work orders every single night, determining which work orders have priority, committing the parts according to schedule and need, and identifies any inventory issues you need to address.

It does this **AUTOMAGICALLY** for you!

“

How Did We Live Without This?

We deal with thousands of work orders a week. We purchased all of the AMS CAM enhancements, but when you ask our Maintenance Planners which feature they like the best, they'll say PARTS Pro. Once they are done planning the WO's for maintenance or turnaround, PARTS Pro now monitors each WO for when the parts are available and notifies the Schedulers when they can perform the work. This used to be done manually... every... single... day... for each WO in the backlog! Now, the Planners have more time to plan and evaluate work than simply having to check on whether parts are here. I could go on and on, but we absolutely depend on PARTS Pro!

~ Planning Supervisor, Pulp Mill

”

Save your team the headache and wasted hours searching for parts – or worse – scheduling maintenance-based production down time only to discover parts aren't in stock!

PARTS Pro lets your team plan with confidence, and saves you significant time and money. We know you will appreciate this essential enhancement to JD Edwards Capital Asset Management.

ASSET MANAGEMENT SOLUTIONS
solving real time problems

Why Asset Management Solutions?

- ✓ We fix problems so your systems work better
- ✓ Because every click counts
- ✓ Eliminate your bottlenecks

Software Installation → Configuration & Testing → Rollout & Support

AMS is with you every step of the way with our precise and custom set of extension tools to address each of your specific needs.

As an Oracle Gold Partner, we have over 20 years experience eliminating headaches, reducing wasted resources, increasing proficiency, and helping our global clients save time and money.
