

Complete Maintenance Work Order Documentation Made Easier

Overcome JDE work order printing limitations with *Enhanced Work Order Print for JD Edwards*

Solving the Work Order Documentation Gap

Standard maintenance work orders entered into the JD Edwards system offer detailed work order instructions, parts requirements, labor requirements, and support documents, all easily accessible in one digital record.

But it's a different story when printing the standard JD Edwards Work Order.

When printing and assembling a physical work order to be handed out and completed, JD Edwards does not support simultaneous printing of the work order and its attachments or support documents such as:

- | Lock-out / Tag-out Procedures
- | Confined Space Entry Procedures
- | Hot Work Permits
- | Inspection Checklists
- | Equipment Calibration Specifications
- | Material Safety Data Sheets

Instead, these documents need to be printed separately and assembled by hand with the main work order document to create a complete, actionable maintenance work order. This creates extra work, possibility for error or missed information, and a waste of time and resources.

The Solution?

Enhanced Work Order Print for JD Edwards by Asset Management Solutions

Enhanced Work Order Print for JD Edwards delivers a complete, system-printed work order that includes the main work order with all of its attachments – including all associated equipment attachments – in one single, seamless print job.

- ▲ Create a complete, actionable maintenance work order packet with just a push of a button, without the delay and wasted time of manually compiling all of the documents.

“Your utilities transform JD Edwards CAM from a software package to a valuable tool; one of the best tools in our Toolbox!”

– Mark R., Mine Maintenance Planner

By adding *Enhanced Work Order Print for JD Edwards* to your system, you gain:

- Direct printing through JD Edwards of work order details and all related attachments (PDF, Word, and Excel attachments)
- A robust, well-formatted, complete work order that is easier to read and contains additional areas for mechanic notes and other information
- Printing of Equipment Header and Equipment Detail attachments to coincide with Lockout/Tagout and Equipment Calibration sheets
- Easy implementation and lower cost of ownership as it requires no modifications to existing JD Edwards software or reports
- Automatically collated and stapled work orders and attachments, depending on your printer

Enhanced Work Order Print for JD Edwards integrates seamlessly into existing JD Edwards systems that utilize the Capital Asset Management module for performing maintenance work orders.
