

ASSET MANAGEMENT SOLUTIONS

JD Edwards EnterpriseOne Resource Assignments

When assigning resources to work orders there are lots of considerations; people, equipment, tools and crews. Optimizing the utilization of these various resources so that they are neither under-utilized nor over-utilized is the goal. With JD Edwards EnterpriseOne Resource Assignments, you can see essential details about your people, crews and equipment, such as skill sets and availability, to best match resources to work orders for each shift.

Work Order Resources

- People
- Tools
- Equipment
- Crews

Finding the Right Resource for the Right Job

- Decrease the need for additional training
- Reduce work-related injuries
- Increase employee performance levels
- Don't push assigned equipment beyond limits

Simplify Scheduling

- Balance supply and demand variables
- Prepare weekly schedules at crew or craft levels
- Set realistic targets based on crew capacity

Optimize Capacity

- Measure schedule compliance by crew
- Adjust loads as crew capacity improves
- Ensure part availability with full JDE integration

Balance Supply and Demand Variables

- Competencies
- Availability & load
- Assignments
- Scheduled work orders
- Emergency work orders
- Incomplete work orders
- Preventive maintenance work orders
